INNOVATION FOR THE WORLD  
SOLUTIONS FOR YOU

# Ambitious **sustainability** goals?

We are committed to support you at any phase of your journey whether you are just getting started or a leader among peers. Together, we can **Bmore** for people and the planet.

## Where are you in your journey toward achieving your sustainability goals?

I need to take first steps with a preferred and reputable partner

Progress against my publicly stated goals

I'm ready for the next challenge

I am a leader among peers in bringing innovative sustainable solutions

As with every collaboration with Berry Global, our sustainability experts will help you identify which material substrate is best in supporting your packaging goals while minimizing its environmental impact.

Using **recycled plastic** is an important step toward a circular economy and critical to giving our natural resources multiple lives.

## Circular Solutions: Recycled Content

We strive to use a variety of recycled materials (PET, HDPE ) within our recycled content solutions. To achieve your goals, we can offer a range of recycled content in our product portfolio, in several cases up to 100%.

# B bottles

We recognize the benefits of clear packaging for your product image and quality. Now with advances in material science and design expertise using recycled content, **clear is possible!** Recycled PET is ideally suited for a variety of consumer products.

Personal & Home Care

Spirits & Beverage

Food & Wellness

Contact your Berry representative to find out more about bottles using recycled plastic for food grade product use.

## Circular Solutions: Recycled Content

We recognize the importance of tangible confidence with every tube experience. We can partner with you to design a more sustainable packaging experience including recycled content without performance compromise.

# B tubes

We offer both laminate and extruded tubes with a range of recycled content. A full line of tube closures with recycled content is available to complete the package.

### Interested in renewable sources?

Our sustainable tubes can be made from sugarcane waste and offer a range of environmental benefits, including significant reduction of greenhouse gas emissions, water use, and fossil fuel consumption.

# B closures

## Circular Solutions:

Berry offers a wide selection of closures made with recycled plastic to serve the food, beauty, personal care, beverage, and home care industries. Closures are available with up to 100% recycled polypropylene and are available in a variety of colors.\*

Suitable to complement other Berry products within our portfolio, we provide closures made with recycled content to achieve a full product offering.

**Dispensing Closures**

**Tube Closures**

**Continuous Thread**

**Overcaps**

Contact your Berry representative to find out more about closures with recycled content.

\*PCR content can impact colors and functional performance. Testing advised.

# Meet with our team of **experts** to review the latest products and materials.

## We'll offer insights on:

- Innovations in recycled plastic use including supply and product contact considerations
- Carbon footprint impact of using recycled and sustainable content
- The variety of recycled plastics options

Depending on your product needs, we recommend starting today to ensure there is time to complete product testing, reserve your PCR resin needs, and meet your 2025 sustainability goals.

Contact us to get our Recycled Content Sample Kit.

Setting sustainability goals has never been more critical, but developing a plan to achieve these goals with your brand and products can be challenging. Whether it is to accomplish an individual project goal or a corporate-wide initiative, together we can **Bmore** for people and the planet.

When partnering with **Berry Global** against short- and long-term sustainability goals, you can experience the benefits of **more**:

### **more** expertise

Berry will partner with your team to educate on advances in resin material science, manufacturing, and design for circularity

### **more** capabilities

Berry's 285 plants, over 35 product lines, and 65 conversion processes allow you to prioritize and fulfill your sustainability initiatives, achieving the greatest impact for your investment

### **more** scale

Berry's global footprint and leading purchasing scale offers unique access to uninterrupted raw material supply and high quality sustainable polymers

### **more** investments

As an industry leader in investments, Berry helps meet the needs of the circular economy and ensure recycling and reuse of your product's packaging

All of these benefits translate into product solutions that leverage the strength of Berry's engineers and proprietary processes in design for circularity. We offer many tailored solutions to help achieve your goals through our **B Circular Range**. Look for the **B** in any Berry Global Collection.

-  **Recycled content**
-  **Reduced carbon footprint\***
-  **Reuse/refill**
-  **Renewable**
-  **Improved recyclability**
