

Wing Tie® Contractor Bags

Unique, heavy-duty bags with a cleverly designed closure

Features and Benefits

- Designed for the work site—42 gallon and 55 gallon drum—for heavy or sharp waste containment
- Less wasted plastic*—use the entire bag—just fill it to the container rim and securely tie it off
- Easier to tie and carry*—no need to rabbit tie or use separate closures to secure—simply tie the wings together for a secure, ready-made handle
- The flat seal means no sacrifice in bag length, when compared to a star or gusset seal liner
- More sanitary*—no need to touch the refuse inside the bag in order to tie off
- Available in black
- Four individually boxed rolls in each carton
- Convenient, interleaf coreless rolls that dispense right from the box

*Versus conventional, non-Wing Tie can liners
